

ASX POSITION DESCRIPTION

STRATEGY ANALYST

ASX “All Roles Flexible”	
ASX offers mutually beneficial flexible working arrangements for all roles. We recognise that employees need to balance work and personal lives.	
Strategy Analyst	
ASX Opportunity Snapshot	What’s On Offer
Role: Strategy Analyst	The primary objective of this role is to support the ASX group strategy team by researching, identifying and analysing opportunities for ASX to expand its current service/product offering or increase the efficiency of existing processes.
Reports to: Strategy Manager	
People Management: n/a	
Budget: n/a	
Date: March 2021	
Location: Sydney, NSW	
Flexible Role: Yes	

What you’ll do:

- Research, identify and analyse potential organic and non-organic opportunities to grow existing ASX businesses and look for opportunities to add new businesses consistent with our trusted position in the domestic market
- Analyse the strategic alignment of potential investment opportunities.
- Conduct financial analysis of opportunities including valuations, impact on earnings, balance sheet, funding sources etc.
- Assist with preparation of discussion, board and strategic offsite papers.
- Where appropriate, assist in any M&A processes including coordination and compilation of the due diligence on potential investments and managing ASX advisors.
- Develop actionable insights by conducting data driven analysis to support senior decision making across the business
- Monitor market trends and the competitive landscape to help identify competitive threats and new business opportunities
- Monitor ASX’s existing investments, including critical review of business plans, financial performance, financial forecasts and assisting with periodic valuation assessments

- Help solve business problems, collaborating and coordinating with a range of internal stakeholders to develop recommendations on a wide range of business issues
- Develop rigorous, fact based, quantitative analysis to support recommendations

What you've done:

- Highly numerate with proficiency in Excel
- Financial modelling (for example, as part of corporate finance studies)
- Familiarity with principles of equity and debt capital markets
- Ability to identify risks, issues and key project impediments and provide realistic solutions / mitigating options
- Degree qualified in finance / accounting / engineering / computer science discipline
- 2+ years prior work experience within finance industry or professional services

And if you've got some of this, even better:

- Experience, interest, passion in financial technology and capital markets

What you need to enjoy and be good at for this role:

- Self-directed
- Strong research skills
- Numeric and financially literate
- Excellent communication skills including presenting to senior management (verbal and written)
- Strategic thinking
- Problem solving, natural curiosity to learn about new industries
- Commercial thinking
