## ASX Group

ASX Limited (ASX) is Australia's leading exchange group and one of the 50 largest companies by market capitalisation listed in Australia. It was created as a national exchange in April 1987 after the amalgamation of Australia's six state-based stock exchanges. In July 2006, ASX merged with SFE Corporation, which operated the major derivatives exchange in Australia.

ASX is ranked among the world's top 10 exchange groups measured by market capitalisation. As a fully integrated exchange group, ASX offers a suite of services including listings, trading, clearing and settlement across multiple asset classes – equities, fixed income, commodities, and energy. ASX has an expansive customer base including retail, institutional and corporate customers directly and through Australian and international intermediaries.

Operations of ASX are licensed by the Australian Securities and Investments Commission (ASIC) and the Reserve Bank of Australia (RBA).

## ASX's approach to tax risk management and governance

ASX has a robust corporate governance and risk management framework that governs the operations of the business. Tax is an important subset of this framework, which strives to ensure high standards of corporate and social responsibility and incorporates comprehensive risk management processes and procedures. The Board and Management have the responsibility of ASX's tax risk and strategy, with the CFO providing regular updates to the Audit & Risk Committee on any tax issues and developments.

ASX carries out operations in Australia through one consolidated tax group. ASX is the head of the consolidated tax group and is responsible for the income tax liability of the Australian-based entities within the group. ASX operates a US-domiciled subsidiary and representative offices in the United Kingdom, Hong Kong and New Zealand. These offices promote ASX services to offshore customers only and ASX provides these services from Australia. The US domiciled subsidiary's contribution to tax is immaterial.

ASX adopts a low risk tax strategy to its activities and tax compliance obligations. ASX's Tax Policy reinforces the following key principles:

- Meet all taxation obligations in accordance with applicable legislation and requirements
- Adopt a conservative approach in interpretation of applicable taxation legislation
- Seek professional advice or a tax ruling from ATO in circumstances where the potential taxation outcome is uncertain
- Do not enter into transactions or structures with the primary objective of reducing tax liabilities

---

## ASX's engagement with the ATO and risk appetite

ASX's adopts a low level of risk to all tax compliance and significant transaction activities. Early engagement with the ATO and tax advisers is undertaken by ASX in order to fully comply with tax obligations and operate in a low risk tax environment.

ASX is also meeting all compliance and payment obligations in each overseas jurisdiction, including the payment of local, state and federal taxes.

## Income tax expense disclosed in the Annual Report

ASX's income tax expense reconciliation is disclosed in Note B6 of the ASX Group's 2020 Annual Financial Report. The income tax expense disclosed in the Annual Financial Report is calculated in accordance with Australian Accounting standards and represents the profit before income tax expense multiplied by the applicable corporate income tax rate of 30% adjusted for "non-temporary" differences. Non temporary differences represent differences between income and expense recognition criteria under accounting principles and income tax legislation, these can include non-deductible expenses and non-assessable adjustments.

ASX's Effective Tax Rate (ETR) is calculated as income tax expense divided by profit before income tax expense.

The following table provides ASX's ETR over the past five years. In 2016 and 2017 ASX's ETR was slightly less than the 30% corporate income tax rate, due to receiving franked dividends from IRESS (a company listed on ASX in which ASX held an equity investment, this investment was sold in February 2019). One off impairment charges and non-deductible expenses also contributed to higher ETR's in 2018 & 2020. Excluding the impairment, the ETR for 2018 and 2020 would be 29.7% and 30.2% respectively. The size of our US subsidiary's contribution to the overall financial results of the business is immaterial and therefore does not affect the overall effective tax rate disclosed in this report.

## ATO published tax information

The ATO discloses tax information from ASX's consolidated group income tax return, this being - total income, taxable income and income tax payable. Published tax information includes, income tax years 2014 to 2018. The ATO is yet to publish income tax years 2019 and 2020.

	FY 16	FY 17	FY 18	FY 19	FY 20
	\$m	\$m	\$m	\$m	\$m
<b>Total income</b>	<b>907.8</b>	<b>931.5</b>	<b>1,012.9</b>	<b>1,089.4</b>	<b>-</b>
Taxable income	607.6	620.0	676.8	955.6	-
<b>Income tax payable</b>	<b>178.6</b>	<b>181.2</b>	<b>197.4</b>	<b>282.6<sup>^2</sup></b>	<b><sup>^2</sup></b>

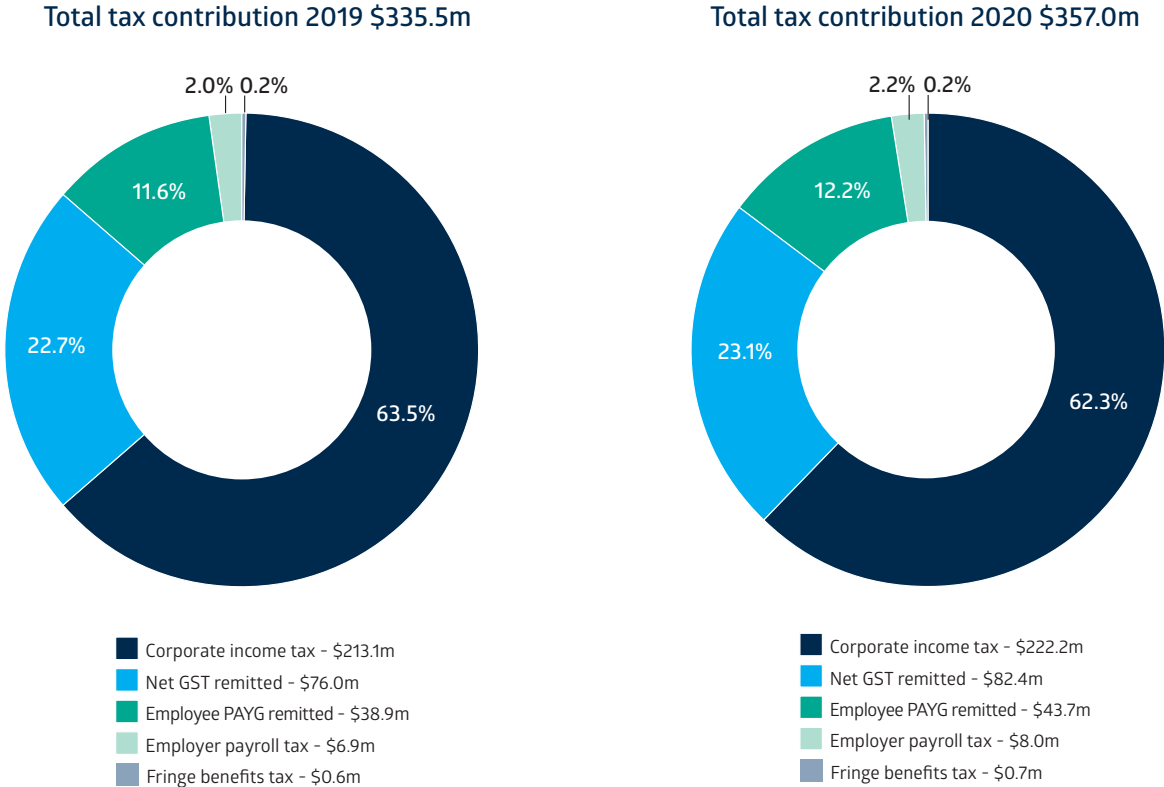

<sup>2</sup> FY19 expected to be published by ATO and FY20 not due at the time of this report.

Total income in the above table comprises total revenue and gross interest income. Taxable income is calculated on accounting concepts and adjusted for allowable tax temporary differences and non-temporary differences in accordance with Australian income tax legislation. Tax payable is then calculated at the corporate income tax rate of 30% of taxable income, less tax offsets. ASX's tax offsets include franking credits received from IRESS shares (FY16 to FY19) and R&D tax offsets.
