

Unparalleled Access to Australia's Financial Markets Community

MAKE THE RIGHT FINANCIAL CONNECTIONS

In an industry where having the right connections is crucial for success, ASX Net takes network connectivity to the next level. Built by ASX solely for the financial markets community, ASX Net gives your business an unparalleled link into the Australian financial markets, allowing you to leverage the community and build unique connections to optimise your business.

**ASX NET IS THE ONLY NETWORK CONNECTION YOU NEED
TO LEVERAGE THE FINANCIAL MARKETS COMMUNITY**

LEVERAGE THE FINANCIAL MARKETS COMMUNITY

ASX Net can provide your business with superior network connectivity to Australia's complex financial markets community through a tailored, low latency connection. It links you to more than just ASX's trading, clearing, settlement and market data services. It can give you direct connection to alternative liquidity venues, brokerage firms, data vendors and application service providers, plus the Asian, European and North American markets via ASX Net Global.

ASX's ability to build bespoke, high-capacity networks between your business and other financial markets participants lets you build deep connections right across the industry.

Think of ASX Net as your ultimate key to leverage the financial markets community.

OPTIMISED FOR YOUR BUSINESS

With ASX Net you determine just how much connectivity is right for you, with the ability to quickly and remotely add or remove specific connections depending on your business needs. It's a model that offers your business true flexibility, scale and choice, with bundling options to help you realise your desired operational efficiency.

BUILT TO DELIVER

ASX Net is the only fully managed network specifically designed and built for the Australian financial markets community. It's a low latency, point-to-point fibre optic network with multiple Points of Presence (PoP) in every major capital city across Australia. When supporting the delivery of third party applications and services, ASX Net is vendor agnostic. This allows us to offer you a bespoke service and build connections and networks that meet the specific needs of your business.

ASX Net's primary hub is housed in our state-of-the-art Australian Liquidity Centre (ALC), where it meets our global network, ASX Net Global. The network's high capacity bandwidth is scaled in preparation for the exponential growth of data requirements to help ensure zero disruption to your business.

A SECURE SERVICE

With the high volume and value of trades occurring every day over ASX Net, we take security and service seriously. To ensure the highest levels of dependability, our network is monitored and managed 24/7. We deliver enhanced security by making our network available only to participants, operators and third-party providers of the financial markets.

ASX Net can also offer the benefit of multiple redundant paths incorporated in our network to help ensure that you always experience fast paced business-as-usual, no matter what.

ENDLESS INTERCONNECTION POSSIBILITIES

ASX has managed critical real-time trading networks since 1987. Today, over 200 Australian financial markets specialists and operators connect to ASX and each other via ASX Net.

With the ability to build bespoke, private interconnections between you and your business partners, the possibilities are endless.

**Realise a deeper connection to Australia's financial markets community.
