

# S&P/ASX Emerging Companies Index

The S&P/ASX Emerging Companies Index (XEC) is an investable benchmark consisting of 200 Australian microcap companies ranked between 350 to 600 by capitalisation at the time of their index inclusion, that have met reasonable liquidity tests.

The S&P/ASX Emerging Companies Index complements existing larger capitalisation indices in the S&P/ASX index suite by providing an investable performance benchmark for companies that generally rank outside the S&P/ASX 300 by total capitalisation. The S&P/ASX Emerging Companies Index provides an opportunity-set of companies characterised as being smaller, often less liquid and under-researched when compared with companies traded on ASX with larger capitalisations.

The methodology developed by S&P and ASX for this Index has been designed to be representative of companies typically found in the small and microcap sector and resulting portfolios. The methodology:

- Selects companies that generally reside outside the S&P/ASX 300. Companies ranked between 350 and 600 by total capitalisation are eligible for inclusion with the maximum number of constituents capped at 200
- Rebalances semi-annually rather than quarterly to reduce index turnover and associated transaction costs
- Allows high performing companies to be held until they migrate into the S&P/ASX 300. Companies are excluded at rebalance when they rank above 300 or below 650 by total capitalisation
- Accounts for the low liquidity often found in this sector while still ensuring that the benchmark portfolio represents a viable opportunity-set for fund managers.

The S&P/ASX Emerging Companies Index delivers:

- Insight into the performance of the microcap sector of the Australian equity market
- Investability, with all companies required to meet liquidity criteria appropriate to this segment
- Benchmarking for performance measurement of Australian microcap portfolios
- An opportunity-set of companies for fund managers wishing to create an index tracking microcap portfolio.

## S&P/ASX Emerging Companies Index Performance and Correlation

For the period from 30 June 2004 to 30 June 2009 the S&P/ASX Emerging Companies Index had the following performance and correlation statistics when compared to the S&P/ASX Small Ordinaries and the S&P/ASX 200.
